

CHAZAPIS COMMISSIONING

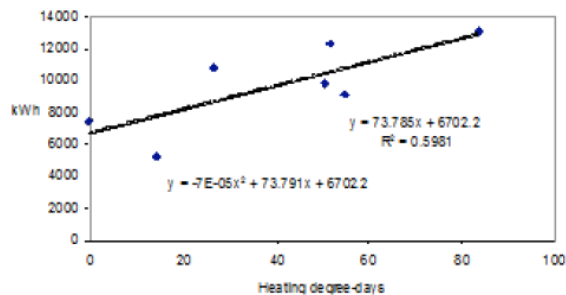

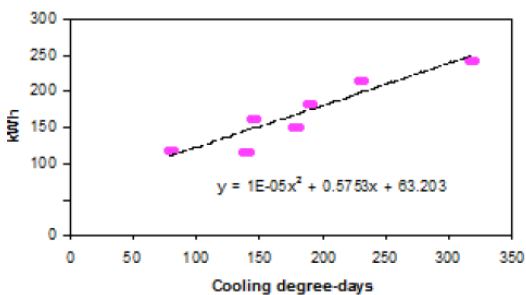

Facility Management: Energy Automation System

ENERGY PERFORMANCE CONTRACT (EPC).

Duration of energy service: to be 5 – 8 years, if possible.

Data analytics of:

1. 5 year past energy bills
2. 5 year past weather data (Heating degree days).
3. 5 year past weather data (Cooling degree days).
4. Establish plotting of performance lines and degree days.

RESULTS

Energy savings are achieved without capital expenses, just through gate keeping and making all staff aware of energy targets.

OPTIONS

Dynamic bar graphs in Office Entrance

COSTS

“Energy service” costs are allocated in the end of each year.

“Energy service” costs as a share in savings.

Win – Win approach.
